New Wheels Project

Introduction to SQL

Problem Statement

Business Context

A lot of people in the world share a common desire: to own a vehicle. A car or an automobile is seen as an object that gives the freedom of mobility. Many now prefer pre-owned vehicles because they come at an affordable cost, but at the same time, they are also concerned about whether the after-sales service provided by the resale vendors is as good as the care you may get from the actual manufacturers.

New-Wheels, a vehicle resale company, has launched an app with an end-to-end service from listing the vehicle on the platform to shipping it to the customer's location. This app also captures the overall after-sales feedback given by the customer.

Objective

New-Wheels sales have been dipping steadily in the past year, and due to the critical customer feedback and ratings online, there has been a drop in new customers every quarter, which is concerning to the business. The CEO of the company now wants a quarterly report with all the key metrics sent to him so he can assess the health of the business and make the necessary decisions.

As a data analyst, you see that there is an array of questions that are being asked at the leadership level that need to be answered using data. Import the dump file that contains various tables that are present in the database. Use the data to answer the questions posed and create a quarterly business report for the CEO.

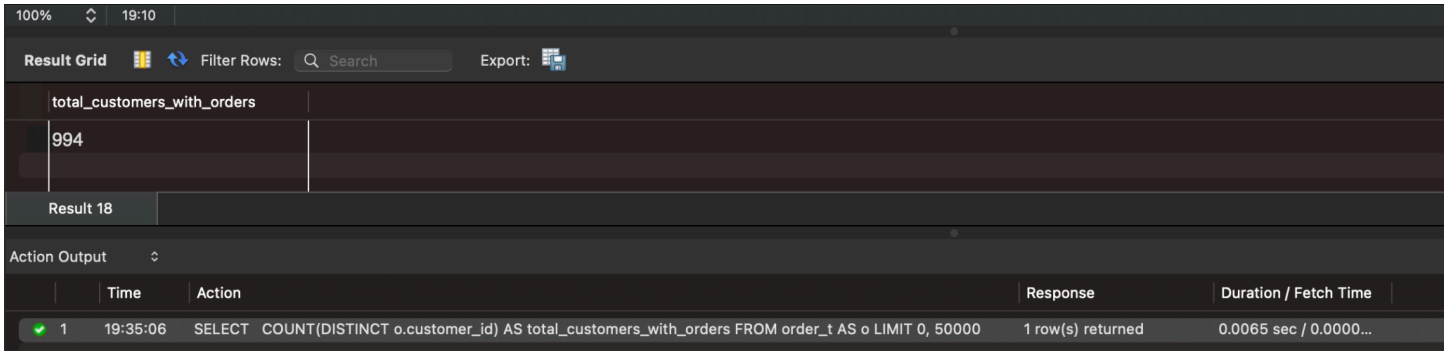
Business Questions

Question 1: Find the total number of customers who have placed orders. What is the distribution of the customers across states?

Solution Query (Q1A):

```
-- Q1A: Total number of customers who have placed orders
SELECT
  COUNT(DISTINCT o.customer_id) AS total_customers_with_orders
FROM order_t AS o;
```

Output:



Solution Query (Q1B):

```
-- Q1B: Distribution of customers across states
SELECT
  c.state,
  COUNT(DISTINCT o.customer_id) AS customers_with_orders
FROM order_t AS o
JOIN customer_t AS c
  ON c.customer_id = o.customer_id
WHERE c.state IS NOT NULL
GROUP BY c.state
ORDER BY customers_with_orders DESC, c.state;
```

Output:

Result Grid Filter Rows: Search Export:

state	customers_with_orders
California	97
Texas	97
Florida	86
New York	69
District of Columbia	35
Colorado	33
Ohio	33
Alabama	29
Washington	28
Arizona	26

Result 20

Action Output

	Time	Action	Response	Duration / Fetch Time
1	19:40:11	SELECT c.state, COUNT(DISTINCT o.customer_id) AS customers_with_orders FROM order_t AS o JOIN custome...	49 row(s) returned	0.0094 sec / 0.00001...

Observations and Insights:

- There are 994 distinct customers who have placed orders
- California and Texas have the most number of customers with orders (97)
- Customers from 49 states in total have placed orders out of 50 states in US

Question 2: Which are the top 5 vehicle makers preferred by the customers?

Solution Query:

```
SELECT
  p.vehicle_maker,
  COUNT(DISTINCT o.customer_id) AS customer_count
FROM order_t AS o
JOIN product_t AS p
  ON p.product_id = o.product_id
GROUP BY p.vehicle_maker
ORDER BY customer_count DESC
LIMIT 5;
```

Output:

Result Grid Filter Rows: Search Export: Fetch rows:

vehicle_maker	customer_count
Chevrolet	83
Ford	63
Toyota	52
Dodge	50
Pontiac	50

Result 22

Action Output

	Time	Action	Response	Duration / Fetch Time
1	20:02:49	SELECT p.vehicle_maker, COUNT(DISTINCT o.customer_id) AS customer_count FROM order_t AS o JOIN produc...	5 row(s) returned	0.0077 sec / 0.00000...

Proprietary content. © Great Learning. All Rights Reserved. Unauthorized use or distribution prohibited.

Observations and Insights:

- Chevrolet, Ford, Toyota, Dodge, Pontiac are the top 5, most preferred vehicle makers by customers. with Chevrolet being the maximum (63 customers)

Question 3: Which is the most preferred vehicle maker in each state?

Solution Query:

```
WITH state_maker_counts AS (
  SELECT
    c.state,
    p.vehicle_maker,
    COUNT(DISTINCT o.customer_id) AS customer_count
  FROM order_t AS o
  JOIN customer_t AS c
    ON c.customer_id = o.customer_id
  JOIN product_t AS p
    ON p.product_id = o.product_id
  WHERE c.state IS NOT NULL
  GROUP BY c.state, p.vehicle_maker
),
ranked AS (
  SELECT
    state,
    vehicle_maker,
    customer_count,
    RANK() OVER (PARTITION BY state ORDER BY customer_count DESC) AS rnk
  FROM state_maker_counts
)
SELECT
  state,
  vehicle_maker,
  customer_count
FROM ranked
WHERE rnk = 1
ORDER BY state;
```

Proprietary content. © Great Learning. All Rights Reserved. Unauthorized use or distribution prohibited.

Output:

Result Grid Filter Rows: Search Export:

state	vehicle_maker	customer_count
Alabama	Dodge	5
Alaska	Chevrolet	2
Arizona	Pontiac	3
Arizona	Cadillac	3
Arkansas	Chevrolet	1
Arkansas	GMC	1
Arkansas	Mitsubishi	1
Arkansas	Pontiac	1
Arkansas	Suzuki	1
Arkansas	Volkswagen	1
California	Nissan	6
California	Ford	6

Result 29

Action Output

	Time	Action	Response	Duration / Fetch Time
1	21:01:11	WITH state_maker_counts AS (SELECT c.state, p.vehicle_maker, COUNT(DISTINCT o....	143 row(s) returned	0.014 sec / 0.000027 sec

Observations and Insights:

- Several states have multiple vehicle makers tied as the most preferred, reflecting equal customer counts for those makers.
- States such as Alabama, Alaska, Florida, and Georgia show a clear single most preferred vehicle maker, indicating stronger brand preference.
- In states like Iowa, Kansas, South Carolina, and Wisconsin, many vehicle makers are preferred by only one customer each, suggesting low market concentration and high variability in customer choices.

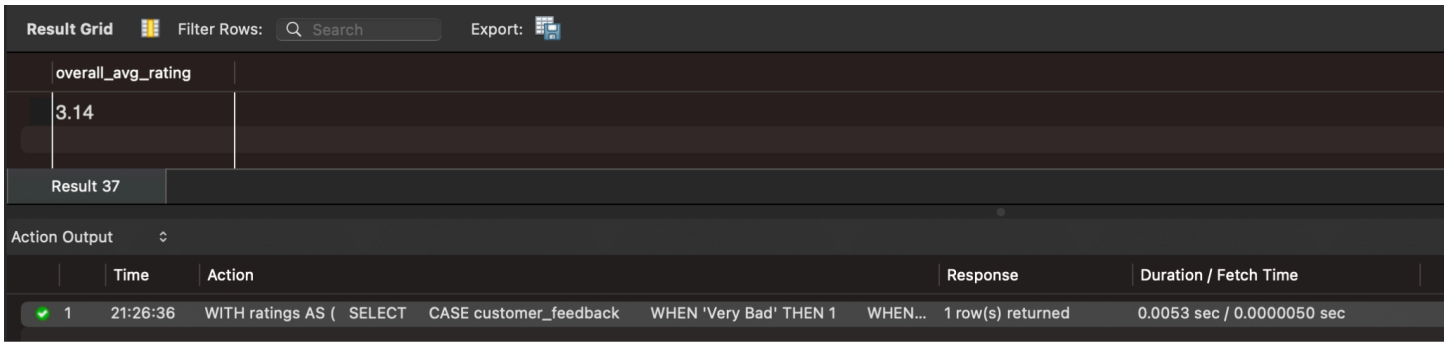
Question 4: Find the overall average rating given by the customers. What is the average rating in each quarter?

Consider the following mapping for ratings: “Very Bad”: 1, “Bad”: 2, “Okay”: 3, “Good”: 4, “Very Good”: 5

Solution Query (4A):

```
-- Overall average rating
WITH ratings AS (
  SELECT
    CASE customer_feedback
      WHEN 'Very Bad' THEN 1
      WHEN 'Bad' THEN 2
      WHEN 'Okay' THEN 3
      WHEN 'Good' THEN 4
      WHEN 'Very Good' THEN 5
    END AS rating
  FROM order_t
  WHERE customer_feedback IS NOT NULL
)
SELECT
  ROUND(AVG(rating), 2) AS overall_avg_rating
FROM ratings;
```

Output:



Observations and Insights:

- The overall annual average rating of 3.14 indicates that customer satisfaction is slightly above "Okay," but not reaching "Good."

Proprietary content. © Great Learning. All Rights Reserved. Unauthorized use or distribution prohibited.

Solution Query (4B):

```
-- Average rating in each quarter
WITH ratings AS (
  SELECT
    quarter_number,
    CASE customer_feedback
      WHEN 'Very Bad' THEN 1
      WHEN 'Bad' THEN 2
      WHEN 'Okay' THEN 3
      WHEN 'Good' THEN 4
      WHEN 'Very Good' THEN 5
    END AS rating
  FROM order_t
  WHERE customer_feedback IS NOT NULL
)
SELECT
  quarter_number,
  ROUND(AVG(rating), 2) AS avg_rating
FROM ratings
GROUP BY quarter_number
ORDER BY quarter_number;
```

Output:

Result Grid Filter Rows: Search Export:

quarter_number	avg_rating
1	3.55
2	3.35
3	2.96
4	2.40

Result 38

Action Output

	Time	Action	Response	Duration / Fetch Time
1	21:31:30	WITH ratings AS (SELECT quarter_number, CASE customer_feedback WHEN 'Very Bad...	4 row(s) returned	0.0032 sec / 0.0000098 sec

Observations and Insights:

- There is a clear downward trend in customer ratings across the year, dropping from 3.55 in Q1 to 2.40 in Q4, which suggests increasing dissatisfaction.
- Ratings in Q3 and Q4 are below the annual average, highlighting that customer experience worsened significantly in the latter half of the year and may require targeted improvement actions.

Proprietary content. © Great Learning. All Rights Reserved. Unauthorized use or distribution prohibited.

Question 5: Find the percentage distribution of feedback from the customers. Are customers getting more dissatisfied over time?

Solution Query:

```
SELECT
  quarter_number,
  ROUND(100.0 * SUM(CASE WHEN customer_feedback = 'Very Bad' THEN 1 ELSE 0 END)
/ COUNT(*), 2) AS pct_very_bad,
  ROUND(100.0 * SUM(CASE WHEN customer_feedback = 'Bad' THEN 1 ELSE 0 END) /
COUNT(*), 2) AS pct_bad,
  ROUND(100.0 * SUM(CASE WHEN customer_feedback = 'Okay' THEN 1 ELSE 0 END) /
COUNT(*), 2) AS pct_okay,
  ROUND(100.0 * SUM(CASE WHEN customer_feedback = 'Good' THEN 1 ELSE 0 END) /
COUNT(*), 2) AS pct_good,
  ROUND(100.0 * SUM(CASE WHEN customer_feedback = 'Very Good' THEN 1 ELSE 0
END) / COUNT(*), 2) AS pct_very_good
FROM order_t
WHERE customer_feedback IS NOT NULL
GROUP BY quarter_number
ORDER BY quarter_number;
```

Output:

Result Grid Filter Rows: Search Export:

quarter_number	pct_very_bad	pct_bad	pct_okay	pct_good	pct_very_good
1	10.97	11.29	19.03	28.71	30.00
2	14.89	14.12	20.23	22.14	28.63
3	17.90	22.71	21.83	20.96	16.59
4	30.65	29.15	20.10	10.05	10.05

Result 40

Action Output

	Time	Action	Response	Duration / Fetch Time
1	21:44:15	SELECT quarter_number, ROUND(100.0 * SUM(CASE WHEN customer_feedback = 'Very Bad' T...	4 row(s) returned	0.0087 sec / 0.0000069 sec

Observations and Insights:

- There is a clear trend of increasing customer dissatisfaction over time, as seen by the rising percentages of "Very Bad" and "Bad" feedback from Q1 (10.97% and 11.29%) to Q4 (30.65% and 29.15%).
- Positive feedback ("Good" and "Very Good") has declined sharply, dropping from a combined 58.71% in Q1 to just 20.10% in Q4.
- The percentage of neutral ("Okay") feedback remains relatively stable, but the overall shift is toward more negative ratings.
- These results indicate that customer satisfaction has deteriorated significantly throughout the year, and immediate action is needed to address the underlying issues.

Proprietary content. © Great Learning. All Rights Reserved. Unauthorized use or distribution prohibited.

Question 6: What is the trend of the number of orders by quarter?

Solution Query:

```
SELECT
  quarter_number,
  COUNT(*) AS orders_count
FROM order_t
GROUP BY quarter_number
ORDER BY quarter_number;
```

Output:

Result Grid Filter Rows: Search Export:

quarter_number	orders_count
1	310
2	262
3	229
4	199

Result 44

Action Output

	Time	Action	Response	Duration / Fetch Time
1	21:53:42	SELECT quarter_number, COUNT(*) AS orders_count FROM order_t GROUP BY quarter_numbe...	4 row(s) returned	0.0056 sec / 0.0000072 sec

Observations and Insights:

- The number of orders has steadily declined each quarter, dropping from 310 in Q1 to 199 in Q4.
- The downward trend in ratings aligns closely with the decline in orders: ratings fell from 3.55 (Q1) to 2.40 (Q4), while orders dropped from 310 to 199 (≈36%). This suggests deteriorating customer satisfaction is likely driving reduced demand and fewer repeat purchases.
- The steepest rating decline occurs in the second half (Q3→Q4: 2.96→2.40), and orders mirror this erosion (229→199). Feedback appears to be a leading indicator, with order volume reacting in subsequent periods.

Question 7: Calculate the net revenue generated by the company. What is the quarter-over-quarter % change in net revenue?

Solution Query (7A) :

```
-- Overall net revenue
SELECT
  ROUND(SUM(quantity * vehicle_price * (1 - COALESCE(discount, 0))), 2) AS
net_revenue_total
FROM order_t;
```

Output:

Observations and Insights:

- The company generated a total net revenue of 48,610,993.78 (48.61 million) for the year.

Proprietary content. © Great Learning. All Rights Reserved. Unauthorized use or distribution prohibited.

Solution Query (7B) :

```
WITH quarterly AS (
  SELECT
    quarter_number,
    SUM(quantity * vehicle_price * (1 - COALESCE(discount, 0))) AS
net_revenue
  FROM order_t
  GROUP BY quarter_number
),
with_prev AS (
  SELECT
    quarter_number,
    net_revenue,
    LAG(net_revenue) OVER (ORDER BY quarter_number) AS prev_revenue
  FROM quarterly
)
SELECT
  quarter_number,
  ROUND(net_revenue, 2) AS net_revenue,
  ROUND(
    CASE
      WHEN prev_revenue IS NULL OR prev_revenue = 0 THEN NULL
      ELSE (net_revenue - prev_revenue) / prev_revenue * 100
    END, 2
  ) AS qoq_pct_change
FROM with_prev
ORDER BY quarter_number;
```

Output:

Result Grid Filter Rows: Search Export:

quarter_number	net_revenue	qoq_pct_change
1	18032549.90	NULL
2	13122995.76	-27.23
3	8882298.84	-32.32
4	8573149.28	-3.48

Result 64

Action Output

	Time	Action	Response	Duration / Fetch Time
1	22:38:23	WITH quarterly AS (SELECT quarter_number, SUM(quantity * vehicle_price * (1 - COALESC...	4 row(s) returned	0.0095 sec / 0.0000072 sec

Observations and Insights:

- Net revenue declined sharply after Q1, with a 27.23% drop in Q2 and a further 32.32% drop in Q3.
- The decline slowed in Q4, with only a 3.48% decrease from Q3, but revenue remained at its lowest.
- The steep Q-over-Q drops in Q2 and Q3 indicate significant business challenges, linked to falling customer satisfaction and order volume.

Proprietary content. © Great Learning. All Rights Reserved. Unauthorized use or distribution prohibited.

Question 8: What is the trend of net revenue and orders by quarters?

Solution Query:

```
SELECT
  quarter_number,
  ROUND(SUM(quantity * vehicle_price * (1 - COALESCE(discount, 0))), 2) AS
net_revenue,
  COUNT(*) AS orders_count
FROM order_t
GROUP BY quarter_number
ORDER BY quarter_number;
```

Output:

Result Grid Filter Rows: Search Export:

quarter_number	net_revenue	orders_count
1	18032549.90	310
2	13122995.76	262
3	8882298.84	229
4	8573149.28	199

Result 61

Action Output

	Time	Action	Response	Duration / Fetch Time
1	22:29:54	SELECT quarter_number, ROUND(SUM(quantity * vehicle_price * (1 - COALESCE(discount, 0)))...	4 row(s) returned	0.0086 sec / 0.0000069 sec

Observations and Insights:

- Both net revenue and order count declined steadily each quarter, with the sharpest drops in Q2 and Q3 (262 to 229 orders and revenue from 18.03 million to 13.12 million).
- Q4 shows a slight stabilization in net revenue, but order volume remains at its lowest.
- The consistent downward trend signals weakening demand and revenue, likely linked to falling customer satisfaction.

Proprietary content. © Great Learning. All Rights Reserved. Unauthorized use or distribution prohibited.

Question 9: What is the average discount offered for different types of credit cards?

Solution Query:

```
SELECT
  c.credit_card_type,
  ROUND(AVG(o.discount), 2) AS avg_discount
FROM order_t AS o
JOIN customer_t AS c
  ON c.customer_id = o.customer_id
WHERE o.discount IS NOT NULL
GROUP BY c.credit_card_type
ORDER BY avg_discount DESC;
```

Output:

Result Grid Filter Rows: Search Export:

credit_card_type	avg_discount
laser	0.64
mastercard	0.63
visa-electron	0.62
china-unionpay	0.62
americanexpress	0.62
maestro	0.62
instapayment	0.62
jcb	0.61
switch	0.61
diners-club-carte-blanche	0.61
bankcard	0.61
diners-club-us-ca	0.61
diners-club-enroute	0.60
visa	0.60
solo	0.59
diners-club-international	0.58

Result 66

Action Output

	Time	Action	Response	Duration / Fetch Time
1	22:40:14	SELECT c.credit_card_type, ROUND(AVG(o.discount), 2) AS avg_discount FROM order_t AS o...	16 row(s) returned	0.0095 sec / 0.000010 sec

Observations and Insights:

- Discounts are uniform across card types, ranging narrowly from 0.58 to 0.64, indicating a consistent discount policy.
- Laser (0.64) and Mastercard (0.63) receive the highest average discounts, but the margin over others is minimal.
- Diners Club International (0.58) and Solo (0.59) are at the lower end, though differences are small and likely not materially impactful.

Question 10: What is the average time taken to ship the placed orders for each quarter?

Solution Query:

```
SELECT
  quarter_number,
  ROUND(AVG(DATEDIFF(ship_date, order_date)), 2) AS avg_days_to_ship
FROM order_t
WHERE ship_date IS NOT NULL
  AND order_date IS NOT NULL
GROUP BY quarter_number
ORDER BY quarter_number;
```

Output:

Result Grid Filter Rows: Search Export:

quarter_number	avg_days_to_ship
1	57.17
2	71.11
3	117.76
4	174.10

Result 70

Action Output

	Time	Action	Response	Duration / Fetch Time
1	22:47:53	SELECT quarter_number, ROUND(AVG(DATEDIFF(ship_date, order_date)), 2) AS avg_days_to_...	4 row(s) returned	0.0018 sec / 0.0000069 sec

Observations and Insights:

- Average days to ship increased sharply each quarter (57 → 71 → 118 → 174), indicating escalating fulfillment delays.
- This rise aligns with falling satisfaction (ratings 3.55 → 2.40), fewer orders (310 → 199, –36%), and declining net revenue ($18.0M → $8.6M, –52%), suggesting delays are a primary driver of performance deterioration.
- Priority action: fix logistics/lead times (carrier SLAs, inventory, fulfillment capacity) to stabilize shipping times, which should lift ratings, retention, and revenue.

Proprietary content. © Great Learning. All Rights Reserved. Unauthorized use or distribution prohibited.

Business Metrics Overview

Total Revenue	Total Orders	Total Customers	Average Rating
48,610,993.78	1000	994	3.14
Last Quarter Revenue	**Last quarter Orders**	**Average Days to Ship**	**% Good Feedback**
8,573,149.28	199	97.96	21.5%

Observations & Insights from queries

1. Customer Base & Distribution
    - 994 customers placed orders, with California and Texas leading (97 each).
    - The customer base is spread across many states, but top states dominate.
2. Top Vehicle Makers
    - Chevrolet, Ford, Toyota, Dodge, and Pontiac are most preferred.
3. State-wise Preferences
    - Some states have clear favorites; others high variability, indicating fragmented preferences.
4. Customer Ratings
    - Overall average rating is 3.14 ("Okay").
    - Ratings declined each quarter (Q1: 3.55 → Q4: 2.40).
5. Feedback Trend
    - Negative feedback ("Very Bad" + "Bad") rose from 22% (Q1) to 60% (Q4).
    - Positive feedback dropped sharply, showing rising dissatisfaction.
6. Order Volume
    - Orders fell steadily from 310 (Q1) to 199 (Q4), a 36% drop.
7. Net Revenue
    - Total net revenue: $48.6M.
    - Revenue dropped sharply after Q1, stabilizing at a low in Q4.
8. Revenue & Orders by Quarter
    - Both metrics declined quarter-over-quarter, mirroring satisfaction and order trends.
9. Discounts by Credit Card
    - Average discounts are nearly uniform across card types (0.58–0.64).
10. Shipping Time
    - Average days to ship increased dramatically (Q1: 57 → Q4: 174).
    - Shipping delays correlate with falling ratings, orders, and revenue.

Proprietary content. © Great Learning. All Rights Reserved. Unauthorized use or distribution prohibited.

Additional Analysis

Following additional analysis was done using the data to capture metrics for fine-tuned business recommendations (refer **Appendix A** for data)

1. Repeat Customers
2. Top 5 states revenue
3. Average Revenue Per Customer
4. Orders with negative feedback
5. Vehicle Maker Revenue Contribution
6. Average shipping time by state
7. Feedback distribution by vehicle maker

These were done to identify the following

- Loyalty and repeat business trends
- Regional and product-based revenue drivers
- Key pain points in fulfillment and customer experience
- Which vehicle makers and states need targeted interventions

Business Recommendations

- Fix fulfillment now
  - Optimize logistics, inventory, and carrier SLAs to restore customer trust.
  - Reduce long shipping times in Montana/Delaware/Kansas/Wyoming/Maine; set state-level SLAs, switch/reroute carriers, and show accurate ETAs at checkout.
- Rescue detractors
  - Target retention campaigns at recent detractors.
    357 orders received negative feedback. Implement a rapid response system for dissatisfied customers to resolve issues and prevent churn.
- Boost retention
  - Incentivize repeat purchases and positive reviews. With only 6 repeat customers (avg ~$48.9k per customer), launch a simple loyalty program and targeted second-purchase offers; personalize for high-value segments.
- Focus regions
  - California, Texas, Florida, and New York drive the bulk of revenue. Prioritize these states for inventory depth, service excellence, and marketing to maximize near-term ROI.
- Product/ Vehicle maker actions
  - Chevrolet, Ford, Toyota, Pontiac, and Dodge are top revenue generators. Ensure these brands are well-stocked and promoted, and analyze feedback for these makers to address specific issues.

Proprietary content. © Great Learning. All Rights Reserved. Unauthorized use or distribution prohibited.

    - Some makers (e.g., Chevrolet, Ford, Dodge) have high counts of both positive and negative feedback. Use this data to work with suppliers and improve product quality and after-sales support.
- Monitor and act
    - Track monthly shipping time, feedback mix, orders/revenue, and repeat rate; trigger alerts when shipping or negative feedback spikes to enable rapid response.

Proprietary content. © Great Learning. All Rights Reserved. Unauthorized use or distribution prohibited.
